Smart decisions for sustainable forest management

Attest

Jeg bekrefter med dette at Safin Doski Hassan har vært med å bidra til det europeiske forskningsprosjektet OptFor-EU, finansiert av EUs Horizon2020-program.

Safin har produsert en interaktiv infografikk med oversikt over europeisk politikk på skogbruksområdet. Han tok på seg oppdraget etter at det ble lyst ut blant IT-studentene ved USN, og har vært en svært god ressurs for prosjektet. Safin tok tak i en svært vag kravspesifikasjon og leverte en løsning som prosjektet var veldig godt fornøyd med.

Han viste både initiativ og gode tekniske ferdigheter, og jeg gir ham derfor mine varmeste anbefalinger!

Marius Rohde Johannessen

Førsteamanuensis IT og informasjonssystemer, Universitetet I Sørøst-Norge

Prosjektansvarlig ved USN i OptFor-EU

Funded by the European Union Horizon Europe programme, under Grant agreement n°101060554. About the project

The project 'OPTimising FORest management decisions for a low-carbon, climate resilient future in Europe (OptFor-EU)' will build a Decision Support System (DSS) to provide forest managers and other relevant stakeholders with tailored options for optimising decarbonisation and other Forest Ecosystem Services (FES) across Europe.

Based on exploitation of existing data sources, use of novel Essential Forest Mitigation Indicators and relationships between climate drivers, forest responses and ecosystem services, OptFor-EU has five specific objectives:

- Provide an improved characterisation of the Forest-Climate Nexus and FES;
- Utilise end-user focused process modelling;
- Empower forest end-users to make informed decisions to enhance forest resilience and decarbonisation;
- Provide a novel DSS service; and
- Bridging different EU strategic priorities, robust science, and stakeholders in the forest and forest-based sectors.

Funded by the European Union Horizon Europe programme, under Grant agreement n°101060554. Views and opinions expressed are however those of the authors) only and do not necessarily reflect those of the European Union or REA (European Research Executive Agency). Neither the European Union nor the granting authority can be held responsible for them.

Smart decisions for sustainable forest management

The DSS will be designed and tested at 8 case study areas, to provide a ready to-use service, near to operational (TRL7) at European level, while a user adoption and up-take plan will maximise the societal and business impact.
